

Summer ecological field work in eastern Oregon

Oregon State University is seeking applicants to join our forest and fuels monitoring field crew this summer. Crew members will gather data about changes to forest structure, fuels, and understory plants as a result of forest restoration activities on the beautiful Malheur National Forest in eastern Oregon. We're looking for people who love to be outside, have good attention to detail, and have a passion for forest restoration. Strong botany skills are highly desired.

For more information, contact Dr. James Johnston at james.johnston@oregonstate.edu.

To apply, go to OSU jobs at <https://jobs.oregonstate.edu/postings/search> and search for posting #P02824CT (field crew leader), #P02825CT (non-student field crew), or visit <https://jobs.oregonstate.edu/postings/97153> to apply as a student
