

Fire ecology field work

Oregon State University is seeking applicants to help Drs James Johnston and Matt Reilly reconstruct multi-century fire histories in western Oregon. Crew members will travel throughout western Oregon and Washington navigating to research sites, searching for evidence of historical fire, removing tree cores and partial cross sections with hand powered increment borers and chainsaws. We're looking for people who love to be outside, have good attention to detail, and have a passion for fire ecology. Ability to work in rugged conditions is a must.

For more information, contact Dr. James Johnston at james.johnston@oregonstate.edu.

To apply, go to OSU jobs at <https://jobs.oregonstate.edu/postings/search> and search for posting #P02826CT or visit <https://jobs.oregonstate.edu/postings/97153> to apply as a student
